Chapter 1 Executive Summary

Chapter 2 Assumptions and Acronyms Used

Chapter 3 Research Methodology

Chapter 4 Product Management Software Market Overview

4.1 Introduction

4.1.1 Market Taxonomy

4.1.2 Market Definition

4.1.3 Macro-Economic Factors Impacting the Market Growth

4.2 Product Management Software Market Dynamics

4.2.1 Market Drivers

4.2.2 Market Restraints

4.2.3 Market Opportunity

4.3 Product Management Software Market - Supply Chain Analysis

4.3.1 List of Key Suppliers

4.3.2 List of Key Distributors

4.3.3 List of Key Consumers

4.4 Key Forces Shaping the Product Management Software Market

4.4.1 Bargaining Power of Suppliers

4.4.2 Bargaining Power of Buyers

4.4.3 Threat of Substitution

4.4.4 Threat of New Entrants

4.4.5 Competitive Rivalry

4.5 Global Product Management Software Market Size & Forecast, 2018-2033

4.5.1 Product Management Software Market Size and Y-o-Y Growth

4.5.2 Product Management Software Market Absolute $ Opportunity

4.6 Global Product Management Software Market: Impact Of Key Regulations

Chapter 5 Global Product Management Software Market Analysis and Forecast By Component

5.1 Introduction

5.1.1 Key Market Trends & Growth Opportunities By Component

© 2025 Growth Market Reports | All Rights Reserved.

5.1.2 Basis Point Share (BPS) Analysis By Component
5.1.3 Absolute $ Opportunity Assessment By Component
5.2 Product Management Software Market Size Forecast By Component
5.2.1 Software
5.2.2 Services
5.2.2.1 Professional Services
5.2.2.2 Managed Services
5.2.2.3 Training and Support
5.3 Market Attractiveness Analysis By Component

Chapter 6 Global Product Management Software Market Analysis and Forecast By Deployment Mode

6.1 Introduction
6.1.1 Key Market Trends & Growth Opportunities By Deployment Mode
6.1.2 Basis Point Share (BPS) Analysis By Deployment Mode
6.1.3 Absolute $ Opportunity Assessment By Deployment Mode
6.2 Product Management Software Market Size Forecast By Deployment Mode
6.2.1 Cloud
6.2.1.1 Public Cloud
6.2.1.2 Private Cloud
6.2.1.3 Hybrid Cloud
6.2.2 On-Premises
6.3 Market Attractiveness Analysis By Deployment Mode

Chapter 7 Global Product Management Software Market Analysis and Forecast By Organization Size

7.1 Introduction
7.1.1 Key Market Trends & Growth Opportunities By Organization Size
7.1.2 Basis Point Share (BPS) Analysis By Organization Size
7.1.3 Absolute $ Opportunity Assessment By Organization Size
7.2 Product Management Software Market Size Forecast By Organization Size
7.2.1 Large Enterprises
7.2.2 Small and Medium Enterprises
7.3 Market Attractiveness Analysis By Organization Size

Chapter 8 Global Product Management Software Market Analysis and Forecast By Application

8.1 Introduction
8.1.1 Key Market Trends & Growth Opportunities By Application
8.1.2 Basis Point Share (BPS) Analysis By Application
8.1.3 Absolute $ Opportunity Assessment By Application
8.2 Product Management Software Market Size Forecast By Application
8.2.1 Product Planning
8.2.1.1 Backlog Prioritization
8.2.1.2 Requirements Management
8.2.1.3 Release Planning
8.2.2 Roadmapping
8.2.2.1 Timeline Roadmaps
8.2.2.2 Now Next Later
8.2.2.3 Portfolio Roadmaps
8.2.3 Collaboration
8.2.3.1 Feedback Portals
8.2.3.2 Stakeholder Communication
8.2.3.3 Go To Market Alignment
8.2.4 Analytics
8.2.4.1 Product Analytics
8.2.4.2 A B Testing
8.2.4.3 AI Assisted Insights
8.2.5 Others
8.2.5.1 Idea Management
8.2.5.2 OKR Tracking
8.2.5.3 Product Portfolio Management
8.3 Market Attractiveness Analysis By Application

Chapter 9 Global Product Management Software Market Analysis and Forecast By End-User

9.1 Introduction
9.1.1 Key Market Trends & Growth Opportunities By End-User

© 2025 Growth Market Reports | All Rights Reserved.

9.1.2 Basis Point Share (BPS) Analysis By End-User
9.1.3 Absolute $ Opportunity Assessment By End-User
9.2 Product Management Software Market Size Forecast By End-User
9.2.1 IT and Telecom
9.2.2 BFSI
9.2.3 Healthcare
9.2.4 Retail
9.2.5 Manufacturing
9.2.6 Others
9.3 Market Attractiveness Analysis By End-User

Chapter 10 Global Product Management Software Market Analysis and Forecast By Pricing Model

10.1 Introduction
10.1.1 Key Market Trends & Growth Opportunities By Pricing Model
10.1.2 Basis Point Share (BPS) Analysis By Pricing Model
10.1.3 Absolute $ Opportunity Assessment By Pricing Model
10.2 Product Management Software Market Size Forecast By Pricing Model
10.2.1 Subscription
10.2.2 Perpetual License
10.2.3 Freemium
10.2.4 Usage Based
10.3 Market Attractiveness Analysis By Pricing Model

Chapter 11 Global Product Management Software Market Analysis and Forecast by Region

11.1 Introduction
11.1.1 Key Market Trends & Growth Opportunities by Region
11.1.2 Basis Point Share (BPS) Analysis by Region
11.1.3 Absolute $ Opportunity Assessment by Region
11.2 Product Management Software Market Size Forecast by Region
11.2.1 North America
11.2.2 Europe
11.2.3 Asia Pacific

11.2.4 Latin America
11.2.5 Middle East & Africa
11.3 Market Attractiveness Analysis by Region

Chapter 12 Key Insights and Analysis

12.1 Pricing and Business Model Benchmarking
12.2 Integration and Ecosystem Landscape Analysis
12.3 AI Features Adoption and Roadmap Trends
12.4 Buyer Criteria and Procurement Patterns: Mid-Market vs Enterprise
12.5 Total Cost of Ownership and ROI Modeling

Chapter 13 North America Product Management Software Analysis and Forecast

13.1 Introduction
13.2 North America Product Management Software Market Size Forecast by Country
13.2.1 U.S.
13.2.2 Canada
13.3 Basis Point Share (BPS) Analysis by Country
13.4 Absolute $ Opportunity Assessment by Country
13.5 Market Attractiveness Analysis by Country
13.6 North America Product Management Software Market Size Forecast By Component
13.6.1 Software
13.6.2 Services
13.6.2.1 Professional Services
13.6.2.2 Managed Services
13.6.2.3 Training and Support
13.7 Basis Point Share (BPS) Analysis By Component
13.8 Absolute $ Opportunity Assessment By Component
13.9 Market Attractiveness Analysis By Component
13.10 North America Product Management Software Market Size Forecast By Deployment Mode
13.10.1 Cloud
13.10.1.1 Public Cloud
13.10.1.2 Private Cloud
13.10.1.3 Hybrid Cloud
13.10.2 On-Premises

Key Statistic

Asia Pacific is projected to be the fastest-growing region for product management software through the forecast horizon, driven by accelerating cloud adoption, rapid digital transformation agendas, and a burgeoning ecosystem of software-native startups. Countries such as India, China, and Southeast Asian markets are scaling product-led growth practices, creating strong demand for roadmapping, feedback, and analytics capabilities that integrate tightly with developer toolchains.

The region's growth is also supported by large enterprise modernization programs in Japan, Korea, and Australia, as well as fintech expansion that requires auditability, prioritization at scale, and data governance. Vendors that localize language support, comply with data residency needs, and build strong partnerships with regional hyperscalers and SIs are best positioned to capture outsized gains.

Significant opportunities emerge from the convergence of roadmapping, customer feedback, and product analytics into unified platforms. AI-assisted prioritization, automated requirements drafting, and insight synthesis from qualitative and quantitative data are reshaping workflows, opening white space for vendors that can deliver measurable impact on time-to-value and roadmap confidence.

There is also a sizable replacement cycle from spreadsheets and generic work tools to purpose-built product management platforms in mid-market and upper-SME segments worldwide. Deep integrations with Jira, Azure DevOps, Slack, Salesforce, and data warehouses, coupled with outcome-based onboarding and partner-led implementations, unlock expansion and cross-sell opportunities.

Key market drivers include the shift to product-led growth, shorter release cadences, and distributed teams that require shared visibility from discovery through delivery. The need to align executives, engineering, design, and go-to-market teams around a single source of truth for priorities and outcomes is accelerating enterprise adoption.

Cloud-first procurement preferences, flexible subscription pricing, and robust API ecosystems further propel demand, while increasing emphasis on compliance, security, and governance in regulated industries elevates the importance of built-in audit trails, role-based access, and data residency options in vendor selection.

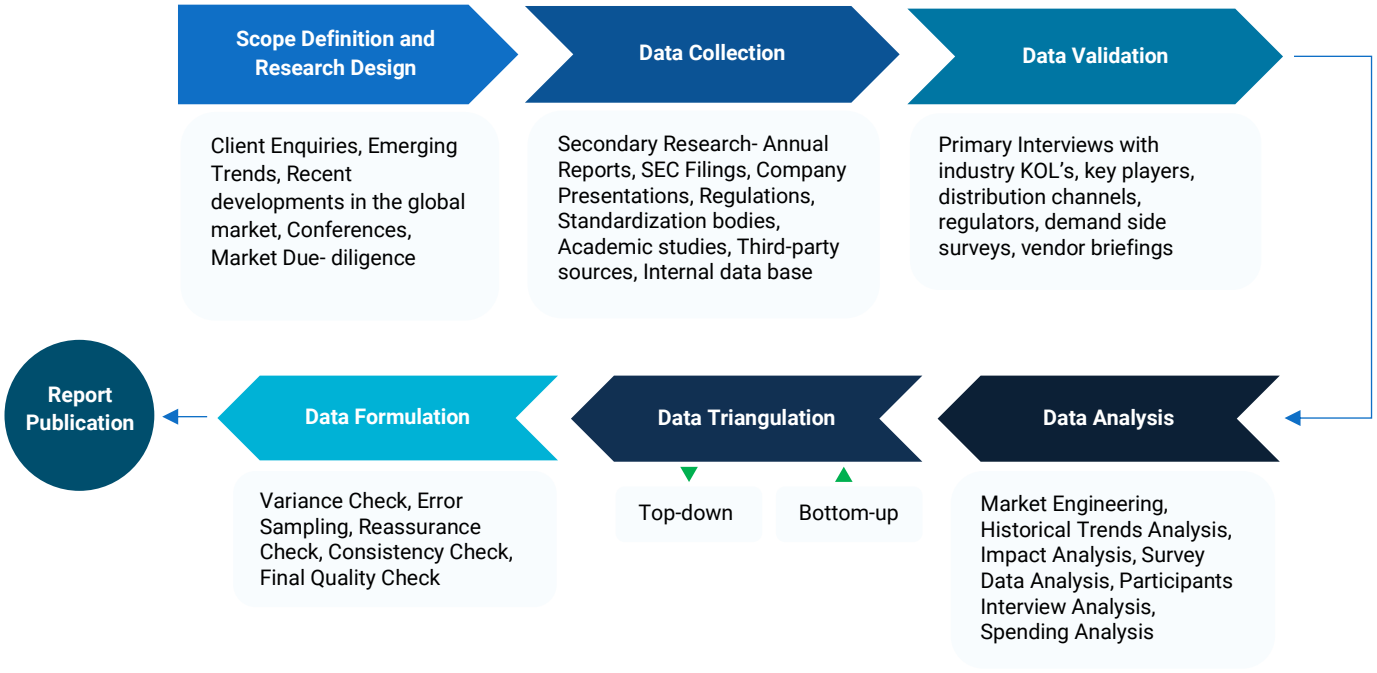
Research Process



Secondary Research

- In compiling the secondary research data for this study, GROWTH MARKET REPORTS has conducted a comprehensive search of relevant published information, including annual reports, SEC filings, investor presentations, trade magazines, association journals, external paid and government databases, and other available secondary sources. The company's focused and disciplined approach to this process, coupled with in-house expertise in secondary research, extensive internal database repository, and strong knowledge capital ensure targeted and comprehensive results.
- This subsequently provides the basis for the design of research questionnaires and interview discussion guides, the identification of data gaps, and assistance in the selection of appropriate targets used in the primary research phase.

Primary Research

- A key element in GROWTH MARKET REPORTS research methodology is the primary data collection phase that includes direct discussions and interviews with a broad base of key opinion leaders (KOLs) throughout the value chain across the globe. GROWTH MARKET REPORTS has an established panel of executives and managers, technical experts, and other industry experts on suppliers, manufacturers, distributors, and end users side. Access to such specialists, market data, market insights, trends, and alternative perspectives throughout the value chain ensures that the analysis done by GROWTH MARKET REPORTS is thorough, robust, verified, and usable.

Key Executives Interviewed

- CXOs - COO/CIO/CDO
- Business heads / Key Stakeholders in Govt. Agencies
- Delivery Heads / Managers / Key Executives

Report Snapshot

This report is designed to provide a holistic view of the Product Management Software market. The report has been broken down into three distinctive categories. The first category entails Market Variables, Trends & Scope includes the identification and analysis of variables in the form of drivers, restraints, and future opportunities. High level interpretation of market attributes using tools such as the Porter's Five Forces Analysis, PESTEL, etc. The second category entails market segments and their respective estimates and forecasts. Regional estimates and forecasts & trend analysis for each country and region is also available in the study. The final category of the study highlights the competitive landscape associated with the market.

In this study, 2024 has been considered as the base year and 2033 as the forecast period to estimate the market size for Product Management Software market.

The Product Management Software market, was valued at USD 12.1 Bn in 2024, and is projected to grow at a CAGR of 10.5% throughout the forecast period (2025-2033). By 2033, the market is anticipated to witness a substantial accretion, reaching USD 28.9 Bn.

Key Takeaways

- Atlas Copco AB is a multinational company that specializes in providing sustainable productivity solutions. The company has several brands that drive the success of its businesses. It operates its business through four segments, namely compressor technique, vacuum technique, industrial technique, and power technique.
- Its compressor technique business area provides compressed air solutions for industrial compressors, gas and process compressors and expanders, air and gas treatment equipment, and air management systems. It has a global service network and innovates for sustainable productivity, mainly for the manufacturing and process industries.
- The vacuum technique business area provides vacuum products, exhaust management systems, valves, and related products. It primarily serves semiconductor and scientific industries, as well as chemical processing, food packaging, and paper handling industries. This business area has a global service network and innovates for sustainable productivity to enhance the performance of its customers.

Regional Growth Opportunities

Key Market Trends & Growth Traction

Based on regions, the global hydrogen centrifugal compressors market is categorized into North America, Europe, Asia Pacific, Latin America, and the Middle East & Africa. The hydrogen centrifugal compressors market in North America held 31.7% market share in 2022 and is expected to expand at 30.4% CAGR during the forecast period. Hydrogen centrifugal compressors are experiencing an uptick in usage, due to the expanding number of power plants in North America. This rising trend is attributed to several factors. Hydrogen is being increasingly recognized as a clean and sustainable energy source, aligning with the growing emphasis on reducing carbon emissions in the power generation sector. Additionally, power plants are exploring ways to optimize their processes and enhance efficiency as well as the use of hydrogen centrifugal compressors contribute to achieving these goals. These compressors play a crucial role in ensuring the safe and effective transportation of hydrogen within power plants, facilitating its utilization in various applications such as gas turbines or fuel cells for electricity generation. Therefore, the increasing installation of power plants in North America has led to a corresponding rise in the utilization of hydrogen centrifugal compressors to support their operations.

The market in Europe is projected to expand at a CAGR of 10.7% during the forecast period. The Europe steel making industry is increasingly adopting hydrogen centrifugal compressors, as hydrogen is a critical component in the reduction process for steel manufacturing. It replaces carbon-based reducing agents responsible for high carbon emissions. Hydrogen compressors play a critical role in facilitating the transportation of hydrogen within steel manufacturing plants, ensuring its safe and efficient utilization for various applications. Additionally, hydrogen-based technologies are emerging as a sustainable energy source that meets the growing demands of the steel making industry in Europe. All of these factors have led to the increased adoption of hydrogen centrifugal compressors to support the operations of the growing steel making industry in Europe.

North America Market Size Analysis and Forecast

North America

The circular economy is a system, which is based on the principles of reuse and regeneration of materials and products to improve sustainability and reduce carbon footprint. Therefore, recycling and reuse of materials & products as well as metals are important in the modern economic system for any developing as well as developed country. Governments across the globe are increasingly developing policies and agendas for circular economy. In recent years,

the circular economy has gained significant traction as a promising tool for some of the majorly pressing crosscutting sustainable development challenges. Which is based on the principles of reuse and regeneration of materials and products to improve sustainability and reduce carbon footprint. Company Portfolio Assessment

Company Overview

- Atlas Copco AB is a multinational company that specializes in providing sustainable productivity solutions. The company has several brands that drive the success of its businesses. It operates its business through four segments, namely compressor technique, vacuum technique, industrial technique, and power technique.
- Its compressor technique business area provides compressed air solutions for industrial compressors, gas and process compressors and expanders, air and gas treatment equipment, and air management systems. It has a global service network and innovates for sustainable productivity, mainly for the manufacturing and process industries.
- The vacuum technique business area provides vacuum products, exhaust management systems, valves, and related products. It primarily serves semiconductor and scientific industries, as well as chemical processing, food packaging, and paper handling industries. This business area has a global service network and innovates for sustainable productivity to enhance the performance of its customers.

Company Presence

- The industrial technique business area provides industrial power tools, assembly technologies, machine vision solutions, quality assurance products, software, and services through a global network. This business area innovates for sustainable productivity for customers in the automotive and general industries.
- The power technique business area provides portable air and power and industrial and portable flow solutions through products, such as mobile compressors, generators, light towers, and industrial and portable pumps. It also offers specialty rental and provides service through a global network. This business area offers sustainable productivity solutions across multiple industries, including construction, manufacturing, oil & gas, and exploration drilling, guided by a forward-thinking approach to innovation. The company focuses on businesses in selected segments, a decentralized organization structure that emphasizes high customer focus, a strong global presence, a stable service business, professional people, and an asset-light and flexible manufacturing setup.
- The company builds close customer relationships through direct and indirect channels by providing professional services, technical competence, application knowledge, and digital capabilities.

Product Description
- Hydrogen is a promising means for driving decarbonization and energy transition. Atlas Copco Gas and Process has decades of experience in processing hydrogen and provides centrifugal turbo compressors and turboexpanders that enable many critical processes throughout the hydrogen value chain. - Atlas Copco Gas and Process designs centrifugal compressors and expanders that meet the challenges of hydrogen production, from hydrocarbon-dominant grey hydrogen sources to sustainable "blue" and "green" hydrogen. - Recently, Atlas Copco Gas and Process commissioned a single-stage integrally-geared centrifugal boil-off gas (BOG) compressor for carrier hydrogen. This compressor is designed to operate at -253°C, which is the icy-cold operating temperature ever recorded for an integrally-geared centrifugal compressor. - Recently, Atlas Copco Gas and Process commissioned a single-stage integrally-geared centrifugal boil-off gas (BOG) compressor for carrier hydrogen. Strategic Alliances & Key Developments

Date	Development	Details	Impact of Development
February, 2025	Acquisition	Atlas Copco AB acquired a Turkey-based distributor of compressed air solutions, which is mainly focused on sales and service of air compressor solutions, providing compressors, parts, and services to the market in Turkey. This acquisition allows Atlas Copco AB to boost its local presence and service capabilities. The acquired business became part of the service division within the compressor technique business area of Atlas Copco AB.	Low High
March, 2024	Contract Award	Atlas Copco AB has been awarded a contract by TERNA, which is the construction arm of GEK TERNA Group, to supply gas turbines and compressors for a new compression station of the Greek Natural Gas Transmission System. The compression station aimed to serve the domestic gas supply in Greece and was designed to support the compression station with the capability to transport up to 10% hydrogen. The acquisition allows Baker Hughes to provide three compression trains that include a total of three Nova LT12 hydrogen-ready gas turbines and three PCL compressors.	Low High
